August 24, 2015

Introduction

DBPedia is a project that :

- extracts automatically information from Wikipedia pages and turns it into a knowledge base
- has more than 3.4 million entries (2010), each of them having an ID referring to a Wikipedia article
- works on 30 languages, covering individuals, places, music, films, games, companies, species (and diseases).
- has a totaly french version developped by INRIA : fr.dbpedia.org
